

Insurance

Medical Insurance:

Medical coverage is required by Bible Land Passages (BLP); however, **travel** insurance is only recommended. BLP does not issue such insurance policies and any need to secure such a policy is the participant's personal responsibility. In the event that medical assistance is required, program participants may have to pay for medical services upfront but will should be reimbursed by their private insurance company (please be sure to check with your personal health insurance provider to determine coverage conditions and limitations). BLP is not involved in securing the participant's personal coverage.

Travel Insurance:

If participants wish to protect their travel investment against an unforeseen cancellation or a needed emergency return flight home, it is recommended that they purchase a travel insurance policy. If a participant desires to purchase such a policy, he/she should be aware that most insurance companies will restrict certain coverage unless he/she submits for coverage within 14 days of registering for the program.

Insurance Assistance: If participants need to purchase either medical or travel insurance, they should refer to the list of providers below. Please note that BLP is not involved in securing travel insurance or the medical insurance offered by these companies and is not under any contract with the companies listed below.
